

The Convertible
Twenty Years

Let it fool you.

Spend a winter in Sweden and you'll know what "getting cold feet" really means. Spend a winter's day driving in a Swedish-engineered Saab 9-3 Convertible and you may forget the season altogether. Its triple-insulated top is designed for comfort all year long. So on the 20th anniversary of our convertible, we can honestly say: Deception has never felt so good. www.saab.com/convertible

Fuel consumption in combined driving 0.0 l/100 km, environmental class 2000, carbon dioxide emission (CO₂) 000 g/km. Car shown with optional extras.
